## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

The manufacturer has classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level.

**Be aware of currency risk.** If you are a non-UK investor, you will receive payments in a different currency, so the final returns you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
