Alert: You're about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	MIGO Opportunities Trust plc is a closed-end investment trust.
Objectives	The investment objective of the Company is to outperform SONIA (Sterling Overnight Average) plus 2% (the 'Benchmark') over the longer term, principally through exploiting the pricing of closed-end funds. The Company aims to achieve its objective by investing primarily in a portfolio of closed-ended investment funds listed on the UK stock market where the manager has assessed that the share price does not reflect the fair value of the underlying assets. The Benchmark is a target only and should not be treated as a guarantee of the performance of the Company or its portfolio.
Gearing	MIGO Opportunities Trust plc has borrowed to purchase assets for the company. This will magnify any gains or losses made by the Company. At the production date of this document the Company had the following borrowings: - £5,000,000 revolving credit facility
Intended retail investor	This product is intended for investors who are prepared and able to accept the risk of some loss to their original investment amount in order to receive a potential return, and who plan to stay invested for at least 5 years. Investors should consider investment in the Company as part of a wider portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk

Higher Risk

Potentially lower reward

Potentially higher reward

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

The manufacturer has classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level.

Be aware of currency risk. If you are a non-UK investor, you will receive payments in a different currency, so the final returns you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment.

Investment performance information

The Investment Manager of MIGO observed over the last 5 years that this fund has a volatility of 8.58% and a return of 5.95% per year.

Therefore, as an investor, you should be aware that your expected return will likely range between -8.16% and 20.06% with a 95% confidence.

The above estimates are based on share price total return with dividends reinvested. However, what you get will vary depending on how the Fund's underlying investments perform, how the overall market performs and how long you keep the investment and your loss could be larger than -20.06% in extreme market circumstances.

What happens if the Company is unable to pay out?

The Company is a closed-end investment trust company listed on the London Stock Exchange and therefore investors will be able to close their investments on each working day. As a shareholder of MIGO Opportunities Trust plc you are not able to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay out, however you will have the same rights as other ordinary shareholders.

What are the costs?

Costs over the time

Invested amount: £1,000 Scenario	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
Total Costs	19.00	57.00	95.00
Impact on return (RIY) per year	1.90%	1.90%	1.90%

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £1,000. The figures are estimates and may change in the future.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different cost categories.

Other ongoing costs: 1.82% made up of 1.40% ongoing charges and 0.42% cost of gearing. Costs applied at the underlying portfolio such as management fees, performance fees, carried interest, and gearing charges incurred by the closed-end funds into which the Company invests, otherwise known as Synthetic Costs, are NOT suffered directly by the Company through its Profit & Loss account and have therefore been excluded when calculating the total ongoing charges figure (“OCF”).

Total fees paid to Asset Value Investors Limited (the Investment Manager) amount to 0.65% of net assets. This charge is included within the OCF quoted above.

One-off costs	Entry costs		Not Applicable.
	Exit costs		Not Applicable.
